

ONLINE MODULE

FOUNDATIONS OF RESTORATIVE PRACTICES & CIRCLES

Participants in this course will learn practical strategies to build strong, healthy relationships with students, families, employees and colleagues. Real life scenarios and experiences bring you to a deeper understanding of the fundamental unifying premise of Restorative Practices—that people are happier, more cooperative and productive and more likely to make positive changes in their lives when those in positions of authority do things with them rather than to them or for them. Through video and digital re-enactments, participants will identify reliable methods for using Restorative Practices and circles to build community, establish norms and address behavior and relationships which is useful in any setting from education and other human services to organizational management.

LEARNING TARGETS

Individual participants will gain an understanding of the foundations to Restorative Practices and the skill to:

- » Explore Restorative Practices facts from myths
- » Identify shame triggers and responses
- » Analyze, measure and improve adult student relationships
- » Identify the physiological, emotional, and psychological needs of students
- » Discuss the steps of the circle process
- » Serious infractions and removal process
